

The Business Approach

Tokenization

Adopting tokenization for PRDS means that we are adopting a new way to issue securities and raise capital for the business through the Blockchain. This means, developing a smart contract to create a token to act as the backbone of the company while this tokens (\$PRDS) is launched on the market (DEX&CEX) for the community to trade on.

Most importantly, the token have certain token distribution mechanism to ensure when the time arises, the token is there to ensure there is enough capital for the development to keep going.

The primary focus of the business is to deliver on its promises to the community by building a hotel in Maldives from the capital being raised with the help of large and small scale investors within Bitgert ecosystem.

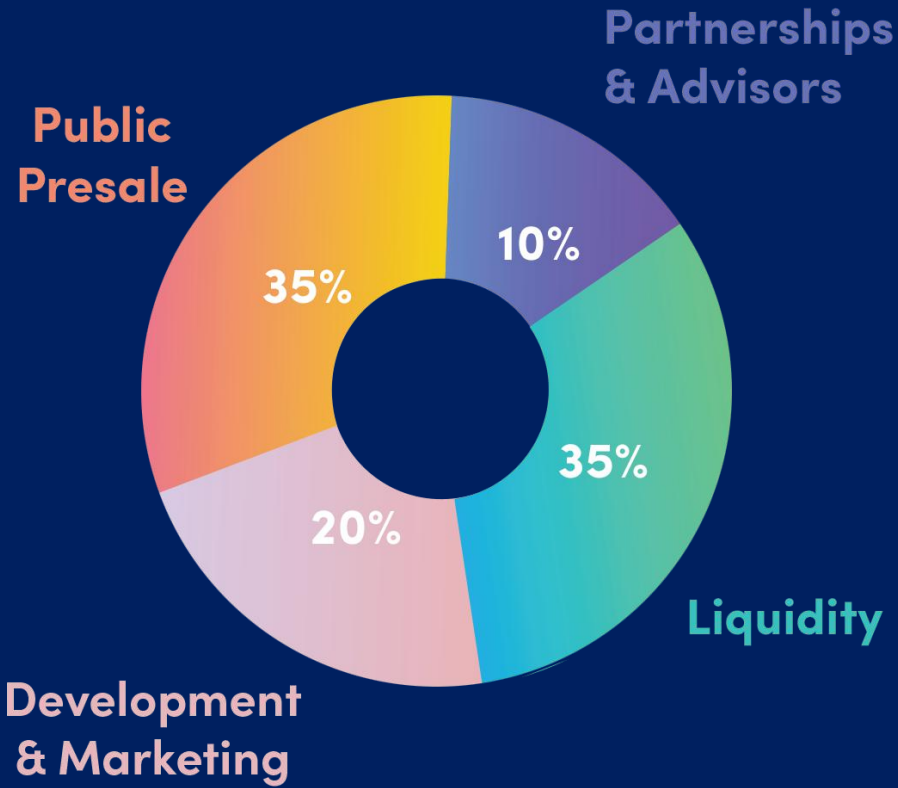

The capital for the Hotel is intended to be raised within the ecosystem by ensuring the community and stakeholders of the business gets their investment equivalent stake in the business as well. Through this model, we ensure the phase 1 of the project is completely fueled by the strong community behind us.

Funding or capital of the phase 2 of the project will be released in due time to ensure the company is always moving forward. This phase of the project will see the investment size increasing exponentially due to the size of the investment. The team expects the island acquiring and the development would be a multimillion dollar investment which would best be delivered from development wallet and strong investors behind the project.

To reach these milestones and increase the market price and value of PRDS during phase 1 will be a significant target of the company. Only when we grow bigger, we can deliver the phase 2. Hence, it is important that the team is persistent and determined to continue delivering and rising capital to ensure hotel construction is ongoing and the hotel finishes as per the set timelines.

A space for the worldwide cryptocurrency communities to come together, celebrate your wins or even work on your own projects. A space designed to accommodate project teams to work on their projects, or host launch events, or host your AMAs from the paradise. These are just few things you could be doing here.

Most important of all, everyone get to have their share of the paradise and have your own space in the Maldives to visit anytime of the year or when you need an escape the most!

Everything we achieve with this token will always come back to the token as reinvestments. A business model we will apply that would allow us to invest a percentage of business profits back to the Token.

- Reinvestment of a portion of the business profit to grow company's PRDS holdings
- Creation of staff wallets during staff onboarding with a fixed amount of balance to each staff. Staff can claim 50% of the total profits of the wallet after 3 years of working with the company Brise Paradise, registered in Maldives, and operating in Maldives as well.

Phase I

Brise paradise hotel opens on a Maldivian island.

The hotel will be the initial step toward realizing our larger objectives in the next phase.

The hotel will have total 18 rooms making it a significant revenue stream to the business after going into full operation. There will be certain reinvestments back to the token from hotel profits to ensure \$PRDS Token sustainability as while growing the market capitalization.

The hotel itself, running it's full course, such as water sports, surfing, island excursions and everything else coming to generate more revenue to the business will be a significant value being added to the PRDS ecosystem.

Dividend distribution to the Proxy NFT holders will commence as soon as the hotel goes into operation

Phase II

Brise paradise Private Decentra-Island

Details of this phase with cost and development plans will be announced as per the roadmap.

The team expects the island acquiring and the development would be a multimillion dollar investment which would best be delivered from development wallet and strong investors behind the project.

Dividend distribution from the island profits to the Proxy NFT holders will commence as soon as the island goes into operation
